#### **DETAILED ACTION**

### Election/Restrictions

1. Election was made without traverse of Group I, claims 1-2, filed on 11/09/04 is acknowledge. Group II, claims 3-6, are withdrawn from further consideration by the examiner, 37 CFR 1.142(b) as being drawn to a non-elected.

2. This communication is responsive to Amendment filed 11/09/2004.

Claims 1-2 are pending in this application. Claim 1 is a independent claim. This action is made non-Final.

# Priority

3. The Applicant's claim to domestic priority under 35 U.S.C. §119 (e), as a provisional of application serial number 60/261,095, filed on 10 January 2001, and provisional of application serial numbers 60/226,358, filed on 18 August 2000, and 60/226,358, filed on 28 February 2000, is acknowledged.

## Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person-having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/937,789

Art Unit: 2167

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goldensher et al. (US Patent No. 6,282,540), in view of Hancock et al. (US Patent No. 6,295,502 B1).

As per claim 1, Goldensher teaches a search method for identifying spatially relevant information in proximity to a reference location comprising the steps of: providing a spatial lexicography database (i.e. DB 24, Fig. 1) containing locations which define the searchable universe, said database comprising: a) coordinate information; and, b) identifier information (col. 4, lines 1-21, col. 7, lines 26-36);

providing a search criteria comprising a reference location and a search radius about said reference location (col. 4, lines 22-49);

converting said reference location into a three dimensional coordinate (col. 9, lines 9-51);

thereafter, converting said search radius into a coordinate box surrounding said reference coordinate which sets the outer boundary for selecting identifier information (col. 4, lines 22-31, col. 6, lines 1-6;

selecting all identifier information from the spatial lexicography database which fall within the coordinate box (col. 5, line 58 to col. 6, line 19, col. 6, lines 24-52, col. 10, lines 14-67).

Goldensher does not expressly teach "providing a second database which contains spatial information"; and "comparing the spatial information of said second database against the selected identifier information where matches of information from both databases identify spatially relevant information". However, Hancock teaches these limitations at col. 11, lines 38-67.

It would have been obvious to one of ordinary skill in the art at the time of the invention to combined the cited references because Hancock's teachings involve "providing a second database which contains spatial information"; and "comparing the spatial information of said second database against the selected identifier information where matches of information from both databases identify spatially relevant information" would have allowed Goldensher's to provide various searching capabilities that allow users to search for particular waypoints or waypoints with particular characteristics.

As per claim 2, Goldensher teaches the spatial lexicography database further comprises attribute information associated with any of said locations (col. 4, lines 35-49);

said search criteria further comprises the use of numerical and character string value parameters for comparison against said attribute information for further refining the selection of identifier information (col. 4, lines 35-61, col. 6, lines 11-45).

Art Unit: 2167

## Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Himmelstein et al.	US 6,701,307 B2
Halstead et al.	US 6,363,392 B1
Biswas et al.	US 6,594,666 B1

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Miranda Le whose telephone number is (571) 272-4112. The examiner can normally be reached on Monday through Friday from 8:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John E. Breene, can be reached on (571) 272-4107. The fax number to this Art Unit is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application should be directed to the Group receptionist whose telephone number is (703) 305-3900.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <a href="http://pair-direct.uspto.gov">http://pair-direct.uspto.gov</a>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
